

CS101 Lecture Notes - Week 1

Topic: Introduction to Algorithms

What is an algorithm?

An algorithm is a step-by-step procedure for solving a problem.

Properties of a good algorithm:

1. Finiteness (must terminate)
2. Definiteness (clear and unambiguous)
3. Input (0 or more inputs)
4. Output (1 or more outputs)
5. Effectiveness (can be carried out in practice)
